

Name: João Pedro Pamplona Soeiro Vieira

Email: pamplona1999@gmail.com | **Phone:** (+351) 917062684 | **Birthday:** 06/02/1999 (26 years of age) |

Address: Rua Almada Negreiros nº67, 2775-011 Parede (Portugal)

I'm a Game Designer, Developer and Producer with 6+ years of experience crafting engaging player experiences and bringing interactive worlds to life. My work spans action-adventures, card battlers, turn-based combat, RPG, TTRPG, and interactive fiction across PC, mobile, and web, with a strong professional expertise in Unity, game design, programming, and full production cycles.

As co-founder of Barking Beagle Studios, I've shipped commercial titles from concept to release, including the award-winning P.I.G.E.O.N. (1st place, NTF 25 Games Category (<https://www.fnac.pt/novostalentos>)). I've also led educational game development with HPV: Combate Viral in partnership with GameDev Técnico and the Portuguese League on the Fight Against Cancer.

I hold a Master's in Computer Science and Engineering from Instituto Superior Técnico, exploring game design and player psychology in my thesis on digital biomarker-based games for children.

I'm always eager to tackle new creative challenges and build games that educate, entertain, and inspire

Education

- | | |
|--------------------------|---|
| 09/2023 – 10/2025 | Master's in Computer Science Engineering with an Expertise in Videogames in Instituto Superior Técnico Universidade de Lisboa, Lisboa (Portugal)
https://tecnico.ulisboa.pt/pt/ |
| 09/2019 – 06/2023 | Bachelor's in Computer Science Engineering in NOVA School of Science and Technology FCT NOVA, Lisboa Portugal
https://www.fct.unl.pt/pt-pt |

Personal Projects and Activities

- | | |
|-----------------------|---|
| 2022 – 2025 | Member of “GameDev Técnico” (GDT). It's a youth association with the goal of creating an environment that enables non-professional game developers to improve their skills in game development, accelerate their ideas with other enthusiasts, and to participate in projects with established institutions and companies to improve their portfolio. (https://www.instagram.com/gamedevtecnico/). GDT helped me improve my creativity, work with tight and short deadlines and work with different teams with new and different dynamics. With them, I participated in 3 long terms projects and 12 game jams. |
| 2023 – Present | I've been running TTRPG campaigns and one-shots for over 3 years. I have crafted narrative, quests, magic items, homebrew rules and villains, including spatial and encounter design, quest structure, and player-facing documentation. I've even solo-developed a fan-made TTRPG conversion of the Divinity Original Sin Saga games RPG system, and I'm developing my own TTRPG system, Fado (https://drive.google.com/drive/folders/1ap4YUnDv_YoPivVhGlzvBAI56mHUrUeM?usp=drive_link). |
